Inform, Educate, Entertain and Engage

Hydravision 3D is the all in one solution for creating and running your own unique on-screen 3D digital channel for enhancing communications and delivering eye catching infotainment.

Hydravision 3D is straight out of the box and ready to use. It supports all Windows media file formats and all popular 3D formats allowing you to create your own on-screen messages or play back web based content.

Hydravision 3D can be operated stand alone or can be networked and controlled remotely. There is no limit to the number of Hydravision players that you can connect to your network.

A full list of additional services and support is available from our website located at www.hydravision.tv
